PROJECT:

TRAVEL AND TOURISM MANAGEMENT SYSTEM

A Travel and Tourism Management System is a comprehensive platform that facilitates the efficient management of travel services, including booking, reservations, itinerary planning, and customer management. It integrates various functionalities to support travel agencies, tour operators, and customers, ensuring a seamless experience for all stakeholders.

BAKERY TEMPLATE (<https://regal-khapse-b430f9.netlify.app>)

The Bakery Project is a web-based application designed to showcase the offerings of a bakery, providing users with an engaging and user-friendly interface. The project utilizes HTML for the structure, CSS for styling, and JavaScript for interactivity.This project demonstrates the integration of front-end web technologies to create a functional, attractive, and engaging website for a bakery, aimed at enhancing the user experience and promoting the bakery's products and services.

CALCULATOR (<https://bucolic-gnome-223ec1.netlify.app>)

The Calculator Project is a simple yet functional web application designed to perform basic arithmetic operations. It is built using HTML for structure, CSS for styling, and JavaScript for functionality.

The project serves as a practical example of how these technologies can be integrated to create an interactive and user-friendly tool.

GUESS THE NUMBER GAME (<https://cosmic-monstera-7b15f1.netlify.app>)

The Guess the Number Game is an interactive web application where the player attempts to guess a randomly generated number within a specified range. This project is built using HTML for structure, CSS for styling, and JavaScript for game logic and interactivity.

VETNARY TEMPLATE(<https://github.com/Edisan252/Veterinary-template>)

The Veterinary Clinic Website is an interactive, user-friendly platform designed to provide information about veterinary services and enhance communication between the clinic and pet owners. This project aims to create a attractive, aesthetically pleasing, and functional website using HTML, CSS, and JavaScript.

PERSONAL PORTFOLIO

This portfolio website is a fully responsive, single-page application built using React.js. The static website showcases my skills, projects in web development and other relevant fields. Project Showcase is one of the key features Includes sections to display detailed information about my projects, complete with live demos.
